SAN FRANCISCO
PRESERVATION BULLETIN NO. 9

SAN FRANCISCO LANDMARKS

INTRODUCTION

Adopted in 1967, Article 10 of the Planning Code provides for San Francisco the ability to identify, designate and protect landmarks from inappropriate alterations. Article 10 also contains language to impose a moratorium on proposed demolitions of landmark sites in order to explore alternatives to demolition of landmarks and buildings located within historic districts.

Since 1967, 230 landmark sites and eleven historic districts have been adopted by the City and are listed as Appendices to Article 10. The landmarks of San Francisco include a variety of structures, sites, districts and objects of special character or special historical, architectural or aesthetic interest or value and are an important part of the City's historical and architectural heritage. Over the past 35 years, the City has designated a diverse grouping of landmarks such as a 19th century Blacksmith Shop and 1906 earthquake and fire Refugee Shack as well as monumental structures such as City Hall, the Ferry Building and most recently, cultural landmarks such as the Garcia and Maggini Warehouse, Carnegie Chinatown Branch Library, and the City Lights Bookstore.

REASONS FOR DESIGNATING AND PROTECTING HISTORIC RESOURCES

Section 1001 of Article 10 explains that the protection of structures, sites and areas of architectural, historical and aesthetic interest serves the following purposes:

- The protection, enhancement, perpetuation and use of structures, sites and areas that are reminders of past eras, events and persons important in local state or national history, or which provide significant examples of architectural styles of the past or are landmarks in the history of architecture, or which are unique and irreplaceable assets to the city and its neighborhoods, or which provide for this and future generations examples of the physical surroundings in which past generations lived; and
- The development and maintenance of appropriate settings and environments for such structures, and in such sites and areas; and
- The enhancement of property values, the stabilization of neighborhoods and areas of the city, the increase of economic and financial benefits to the city and its inhabitants, and the promotion of tourist trade and interest; and
- The preservation and encouragement of a city of varied architectural styles, reflecting the distinct phases of its history: cultural, social, economic, political and architectural; and
- The enhancement of human life in its educational and cultural dimensions in order to serve spiritual as well as material needs, by fostering knowledge of the living heritage of the past.
