

18:13:33 From John Francis : Feel free to reach out to me at john.francis@sfgov.org.

18:15:18 From Christine Hanson : It is important that the CAC continue. Anyone else from the Community have an opinion about this?

18:16:42 From Myrna Melgar : I can discuss with Supervisor Safai!

18:17:50 From Myrna Melgar : Also remember that City College is embarking on their institutional master plan - so it may be that we make sure we increase their involvement in the CAC

18:19:26 From Christine Hanson : Perhaps a CAC rep for CCSF and an alternate rep for meetings where the rep cannot attend.

18:49:46 From Harry Bernstein : part-time faculty were evidently not targeted for faculty housing. They may not have had the necessary income

18:52:20 From Brigitte Davila - She set : @Harry - a criteria has yet to be developed for faculty housing

18:53:51 From Harry Bernstein : The simple question of how much money is needed from private and public sources was not answered, was it?

18:54:15 From Harry Bernstein : Anyone else want to try?

19:01:58 From Jennifer Heggie : Harry, They were noise, air pollution and transportation

19:02:51 From Jennifer Heggie : follow on, although air pollution could be mitigated

19:11:49 From Jennifer Heggie : Will the geothermal wells be removed or kept because they will be under Lee Avenue and future buildings?

19:15:09 From Christine Hanson : The recently passes Access agreement between SFPUC and City College would have the most information.

19:15:26 From Christine Hanson : ...recently passed...

19:15:51 From Jennifer Heggie : The agreement doesn't state the result of engineering analysis.

19:16:01 From Christine Hanson : No it does not.

19:18:12 From Corey Smith (HAC) : Thank you to the CAC for continued work on this!

19:18:28 From Christine Godinez : Thank you everyone!
